So far, we have looked at the features in explanation texts, what the reader needs to be able to find, how important it is to think about layout and how to use a variety of simple and more complex sentences to add detail or give quick factual information. You have already looked at the digestive system in LCC so today you need to start pulling together all of the information you're going to need. Together, we can plan your 'How..' or 'Why..' title and some sub-headings to help guide your planning and then the rest of the session will be your time to research/take notes and we'll stay online if you'd like to ask anything. We have added a screenshot of the digestive system pages from 'Anatomy' to help give you some ideas. If you find an interesting fact that doesn't fit in a particular paragraph, keep it for a 'Did you know...?' box. Other links to digestive system information:
